

Rubber Blades

High-Quality Patented Rubber Blades

Custom lengths to fit your municipal or light duty plows.

Features & Benefits

- **High Quality Material:** Styrene-butadiene flat rubber sections made in a continuous press/cure form comparable to a radial tire.
- **Unmatched Strength:** 2 layers of high performance synthetic cloth provides tensile strength that reduces rip, tear and premature wear.
- **No-Hassle Installation:** Flat, sectional blades replace long rolls of rubber that require "relaxing" prior to installation.
- **Customizable lengths:** Multiple lengths and custom punches available.
